

Volume Lash Extensions Course Syllabus

Course Description

The Lash House volume lash course that will build off the foundations of the classic lash extension course. This course will require students who have already participated in the class course or who have already been practicing in classic lashing. The students will understand the theory of volume and perfect the technique of volume lashing. This course will include the types of lashes, creating styles, proper attachment of lashes, product knowledge, sanitation, and understanding all the protocols. This volume lash course focuses on giving clients the fuller lavish lashes that they're looking for. With this course you have the opportunity to build the skills to offer more to your clientele.

Method of Instruction

The Lash House volume lash course will consist of understanding the theory of volume lashes, types of lashes, creating different styles, mapping, proper weight with lashes, and proper attachment of lashes. The volume course will be a resource and guide for a professional lash artist to be successful in giving a safe and desired lash to clients. The Lash House course emphasizes how to correctly build volume fans. While offering students a variety of different ways to build volume fans. The lecture will consist of the education in product knowledge, growth cycles, and sanitation. The students will understand all protocols of safety, step by step application, emergency. This segment will include class discussions and Q/A of what was reviewed in the lecture portion of the course. After a full day (8 hour) of classroom work and a thorough understanding of the education of volume lashing, the course will proceed to the practical portion of the course.

The practical portion of the course will proceed on the second day (day 2) of class, where the students are able to put what they've learned into place. The Lash House practical course will consist of the students working on a mannequin. The students will apply the volume extensions on the mannequins, while putting the content of the lecture to use. The students are able to style, lash map, build fans and apply the step by step application of the lashes while doing safely. During this time the students are able to practice the different ways to build volume fans. This will be a time where the students are able to find what technique works best for them. This will take place in the first half of the second day (day 2: 4 hours) of the course. For the

final practical of the course, after the students are confident working on mannequins. The students are responsible for being in a live model for them to practice all the knowledge they've learned. The students will complete a full volume set of lashes on their live model. This final practical will have 3-4 hours to complete the model. Before completing the course the students will take a quiz and review the full volume set on live model.

Course Objectives

1. Understand the theory and knowledge of practicing volume lash extensions in a safe and correct application process.
